## **DETAILED ACTION**

### ***Reasons for Allowance***

The following is an examiner's statement of reasons for allowance:

Regarding claim 9, the prior art does not teach or fairly suggest a method for flagging an oversaturated pixel comprising reading a signal voltage, comparing the signal voltage to an adjusted saturation voltage and storing a saturation flag in response to the signal voltage exceeding the adjusted saturation voltage, wherein

the adjusted saturation voltage is set to a minimum signal level.

The prior art- Wang (US6803958)- teaches a method comprising storing an output level of a photodetector, comparing the output level to an adjusted saturation voltage, outputting an adjusted maximum voltage in response to the adjusted saturation voltage exceeding the output level, storing a reset level from the photodetector, calculating a difference voltage from the output level and the reset level and outputting the difference voltage in response to the output level exceeding the adjusted saturation voltage.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
